# The challenge

The **Jesús Benavides** notary's believed that through technology and the digitalisation of processes, it could improve the quality of its services and increase the productivity and efficiency of its workers.

In summary, the objectives of the Jesús Benavides Notary's were:

**1** Find a partner with whom to develop digital functionalities that will facilitate access to notarial services for your clients.

**2** Improve the efficiency of its internal resources and processes.

“Bikle Legal has developed a very innovative platform in the notarial field, the automation in the preparation of draft deeds digitally, allowing our clients, through a simple click to access an online form that allows them to prepare their own draft deeds”

## The path to success

The route towards achieving the initial objectives was a clear path. **Bigle Legal's support was key in this process, holding regular meetings at all stages of the chain** (with senior management, development and project managers) to ensure the implementation of the project.

**The adoption of Bigle Legal's platform, from the first project analysis meeting to the start-up, took 4 months**, enough time to start automating templates, which generated an increase in the efficiency of the workers, speeding up the processes, which was immediately reflected in the satisfaction of the notary's office's clients.

One of the initial drawbacks that Jesús Benavides faced was the difficulty in adapting the platform to the particularities of the Notary's activity, as the scope of the

public deed covers very varied and complex branches of law, such as, for example, a stable partnership deed, a commercial power of attorney, a divorce deed, etc., **the need to adapt the platform to the specific needs of each case has been the area that has required the greatest effort and dedication.**

Once the previous phase has been completed, Jesús Benavides Notary's emphasises that the ease of use of the Bigle Legal platform and its user-friendly interface **makes it easy and intuitive for anyone to create a legal document**, regardless of their legal knowledge, which is highly valued by the Notary's clients.

# Results

The Jesús Benavides notary's office emphasises that **thanks to Bigle Legal's platform, time saving is a highly appreciated value**, since with a few brief questions it is possible to obtain a draft of a deed. In addition, the most outstanding results are:

## › Efficiency.

35 minutes of time saved per document.

## › Agility.

By using predefined fields, it is possible to quickly draft scripts, ensuring that all requirements are taken into account.

## › Zero errors.

The platform ensures that the documents meet all the necessary requirements, as well as the parties involved, avoiding material errors in the manual drafting of a draft deed.

## › Direct communication with your clients.

This facilitates the exchange of information in a quick and agile manner.

## › Quality of service.

This is reflected in client satisfaction.

## › Agility of legal consultations.

Jesús Benavides receives and manages legal queries quickly and efficiently, which has increased client satisfaction by 100%.

**Jesús Benavides has increased client satisfaction by 100% by using Bigle Legal.**

“Bigle Legal has radically changed the way we work with our clients, especially in terms of document production. We now handle the same number of documents per year in significantly less time”
